COOL STUFF FOR SERIOUS RACE FANS

SURECAN

The award-winning SureCan was designed with all of your gas-powered machines in mind. With patented technology, the SureCan offers its user the best experience they have ever had with a fuel can. The flexible spout rotates down more than 180 degrees and fits perfectly into any machine's fill location, while the thumb-release trigger on top controls the flow. By pulling straight back on the safety trigger and then down on the thumb button, fuel is released immediately while you stay in complete control. When you notice your tank is almost full, slowly release the thumb button and allow the excess fuel to drain from the top of the spout before rotating it back up. No more bending over, spilling your fuel can forward and loading it in an awkward position. The SureCan is a high-quality fuel dispensing machine.
